

ESCRS 2016 SYMPOSIUM

ABiC™

AB-INTERNO CANALOPLASTY

Join us during ESCRS 2016 in Copenhagen at the Ellex Eurotimes Symposium to hear the latest clinical results for ABiC™ – a new comprehensive ab-interno MIGS procedure. Performed via a self-sealing clear corneal incision, ABiC™ flushes out the natural outflow channels, without damaging tissue and without leaving behind a stent or shunt.

“A NEW MIGS ON THE BLOCK?”
