CHICAGO EXCIMER LASER FORUM

Please join us for an interactive educational program on Excimer Laser technology in Chicago. This program is a great opportunity to gain valuable clinical pearls from your colleagues.

Attendees at this Forum will:

- Discuss and compare existing and upcoming technology
- Discuss the various common complications that can develop from excimer laser surgery and options to address them
- Assess the various techniques and adjustments for improving outcomes with excimer laser surgery
- Define the various outcome measures that can be applied in a laser vision correction practice to address today's patient needs
- Identify the different parameters that can be used to address astigmatism with excimer lasers
-
