

FLURON®
Leading in purity and variety

SILURON 2000

NEW

HIGHLY PURE SILICONE OIL
FOR INTRAOCULAR USE

G-80740
SILURON 2000
syringe 10 ml, sterile

**Excellent dynamic
viscosity**

Easy to apply

**Perfect for
small incisions**

THE DIGNITY OF PERFECTION

Title: Novel Developments in the Field of Silicon Oil
(Free Paper Session: Retina Surgical)

Date: February 20th, 2012

Time: 10:30 a.m.-12:00 a.m.

Room: Hall 3

Current Position:

Consultant Vitreoretinal Surgeon and Clinical Lead Surgical Retina
St Paul's Eye Unit , Royal Liverpool University Hospital

Biography Highlights:

- Clinical Lecturer University of Liverpool
- Specialist in Ophthalmology in German and United Kingdom
- Research active clinician with a special interest in the development of novel tamponade agents for vitreoretinal surgery
- Author on 15 international peer-reviewed publications regarding ocular endotamponades
- Co-Investigator for Densiron Heavy Silicone Oil Studies

Abstract

This Presentation aims to update the audience on the latest developments in the field of silicone oils. Used mostly unchanged for several decades in the treatment of complex vitreoretinal procedures, silicone oil has recently being the focus of renewed research efforts in line with an ever expanding list of surgical indications. Second-generation silicone oils with improved physical properties demonstrate emulsification-resistance in-vitro as well as improved injectability, particularly when used in conjunction with modern, small-gauge, surgical instrumentation. They represent a welcome new addition to the vitreoretinal surgeons' armory.
